DETAILED ACTION

Allowable Subject Matter

Claims 1-4, 6-12 and 14-16 are allowed.

Reasons for Allowance

Claims 1-4, 6-12 and 14-16 are allowed since there is no prior art of record that teaches or suggests a liquid crystal display with a uniform common voltage and a method for fabricating thereof comprising a relationship of various elements as claimed with the specific allowable subject matter cited in the following claims:

Claim 9 (device) & claim 1 (method):

- a lower substrate comprising:
 - a plurality of common electrodes adapted to transmit a common voltage
 - a plurality of common electrode pads electrically connected to the common electrodes, the common electrode pads and the common electrodes are positioned at the same plane on the lower substrate
- an upper substrate comprising:
 - a plurality of color filter; black matrices disposed between adjacent color filter; the black matrices being covered by the color filters, and each color filter having a lower surface
 - a plurality of photo spacers positioned on the upper substrate, wherein each of the photo spacers is in direct contact with the lower surfaces of adjacent color filters and corresponding to one of the black matrices and one of the common electrode pads of the lower substrate

-- a conductive material layer positioned on the upper substrate covering the photo spacers, wherein the conductive material layer covering the photo spacers is connected to teach of the common electrode pads corresponding to each of the photo spacers

Claims 10-12 and 14-16 are allowed since they depend on allowed claim 9.

Claims 2-4 and 6-8 are allowed since they depend on allowed claim 1.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kodate (US 5,748,266) discloses an active matrix liquid crystal display and the prevention a signal delay thereof by having a potential supplied to a common electrode from a storage capacitance line by forming a pillar of a color filter to specify a cell gap between an array substrate having the storage capacitance line and a facing substrate having the color filter and electrically connecting the common electrode covering the pillar of the color filter with the storage capacitance line on the array substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
